---

## CAREER SUMMARY

Enthusiastic web developer with a background in finance and benefits. Innovative and dedicated professional with both back and front end programming experience, specializing in Ruby, JavaScript frameworks, and Ruby on Rails. Team player and eager to work in a collaborative and open environment.

## SKILLS

**Skills:** Ruby, JavaScript, Ruby on Rails, Python, jQuery, Underscore.js, SASS, Sinatra, Jekyll, and Ubuntu

## WORK EXPERIENCE

### MOBLIZE

Houston, TX  
2015

#### Product Developer

- Worked within an agile development team in support of Moblize's current and upcoming product suite.
- Implemented multiple views, charts and enhancements for our product line, and addressed ongoing bug fixes.
- Converted current products over to React.js framework and created new components for upcoming enhancements.

### MAKERSQUARE

2014

Full-time Accelerated Learning Program focused on training and developing students to become JavaScript and Rails developers.

#### Project Experience:

**Bot Report:** Ruby on Rails application that accepts a company's financial data and returns an analysis of that company.

Performs Ratio analysis, common-size analysis, and has the capability to project Pro Forma Financial data. Constructed using a PostgreSQL database, and tested in RSPEC.

**Technology Stack:** Ruby, Ruby on Rails, ERB, Underscores.js, jQuery, pSQL, and SASS

**APIs:** New York Times

**EatIt App:** Single Page Angular application backed by Ruby on Rails. Suggests recipe based on preferred and disliked ingredients.

Front-end primarily in Angular. Scraper created and used to parse database for recipes, and to create relationships for recipes.

**Technology Stack:** Ruby on Rails, Angular.js, jQuery, Underscore.js, MongoDB, and SASS
